

Ninepoint Energy Fund

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

JUNE 30

2021

The interim management report of fund performance is an analysis and explanation that is designed to complement and supplement an investment fund's financial statements. This report contains financial highlights but does not contain the complete interim financial statements of the investment fund. You can get a copy of the interim financial statements at your request, and at no cost, by calling 1-888-362-7172, by visiting our website at www.ninepoint.com or SEDAR at www.sedar.com or by writing to us at: Ninepoint Partners LP, Royal Bank Plaza, South Tower, 200 Bay Street, Suite 2700, P.O. Box 27, Toronto, Ontario M5J 2J1. Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The objective of the Ninepoint Energy Fund (the “Fund”) is to achieve long-term capital growth. The Fund invests primarily in equity and equity-related securities of companies that are involved directly or indirectly in the exploration, development, production and distribution of oil, gas, coal, uranium and other related activities in the energy and resource sector.

To achieve the Fund’s investment objective, a fundamental analysis is employed to seek to identify superior investment opportunities with potential for capital appreciation over the long-term. This is accomplished by seeking out undervalued companies backed by strong management teams and solid business models that can benefit from both industry and macro-economic trends.

The Fund may follow a more concentrated investment approach and, from time to time, overweight certain sub-sectors within the energy and resource sector, when deemed appropriate by the Portfolio Manager. This may result in the Fund’s portfolio weighting being substantially different from the weightings of the S&P/TSX Capped Energy Total Return Index.

As part of its investment strategy, the Fund may:

- engage in short selling in a manner consistent with the investment objectives of the Fund and as permitted by securities regulations;
- engage in securities lending as permitted by securities regulations;
- invest in exchange-traded funds (ETFs) as permitted by securities regulations;
- invest in and overweight cash and fixed income securities based on the market outlook for the energy sector; and
- use derivatives, such as options, futures, forward contracts and swaps, for both hedging and non-hedging strategies, in a manner which is consistent with the investment objectives of the Fund and as permitted by securities regulations.

Risks

The risks of investing in the Fund are described in the Fund’s simplified prospectus. This Fund is suitable only for investors seeking long-term capital growth potential of the energy and resource sectors. This Fund is suitable for investors with a high investment risk tolerance and have a long-term investment horizon. There were no significant changes to the investment objective and strategies that affected the Fund’s overall level of risk during the reporting period.

Results of Operations and Recent Developments

The Fund, Series A returned 117.7% in the first half of 2021, while its benchmark, the S&P/TSX Capped Energy Total Return Index, returned 55.9%.

Oil rallied appreciably in the first half of 2021 based upon normalizing demand patterns following a historic demand shock due to COVID-19. Further, an unprecedented deal with OPEC members helped lead to dramatically falling inventories with the global oil surplus down approximately 70% in the first half of the year. US shale producers also continued to prioritize return of capital and deleveraging over production growth and the US rig count remained below the level required to maintain flat production. ESG pressures intensified with several activists successfully winning Board seats, most notably with Exxon where ¼ of the Board was replaced and calls of production cuts soon followed. Given the continuation of insufficient investment for nearly 7 years by the global supermajors, ESG pressures make it that much more difficult for them to increase spending and stave off production declines. With quickly improving demand, OPEC will slowly bring back curtailed production while continuing to drawdown oil inventories supporting the current oil price.

Energy stocks, while strong performers, remained depressingly valued with trading multiples being lower than when they began the year, despite strong performance. With extremely strong levels of free cash flow generation, companies began the process of returning free cashflow back to shareholders and now with most balance sheets having been repaired, we look for meaningful shareholder returns in the second half of the year.

The Fund materially outperformed its benchmark in the first half of the year because we correctly identified the inflection point for oil and strategically amassed positions in companies that we determined would maximally benefit from an inflection in the oil price. Many of these names rallied by more than 75% over the first six months of the year.

Ninepoint Energy Fund

June 30, 2021

The Fund's net asset value increased by 203.2% during the period, from \$170.4 million as at December 31, 2020 to \$516.5 million as at June 30, 2021. This change was predominantly due to net subscriptions of \$117.5 million, realized and unrealized gains on investments of \$239.2 million and income of \$2.2 million, offset by expenses of \$12.8 million.

Related Party Transactions

MANAGEMENT FEES

The Fund pays a management fee to the Manager at an annual rate of 2.50% for Series A units, 1.50% for Series D units, Series F and ETF Series units, and as negotiated by the unitholders of Series I. Effective April 30, 2021, the management rate of Series D shares was reduced from 2.00% to 1.50%. The management fee is calculated and accrued daily based on daily net asset value of that series of the Fund, and is paid monthly. For the period ended June 30, 2021, the Fund incurred management fees of \$3,256,920 (including taxes). The breakdown of the services received in consideration of the management fees, as a percentage of management fees, is as follows:

	Portfolio Advisory	Trailing Commissions
Ninepoint Energy Fund – Series A	60%	40%
Ninepoint Energy Fund – Series D	86%	14%
Ninepoint Energy Fund – Series F	100%	–
Ninepoint Energy Fund – ETF Series	100%	–

Out of the management fees that the Manager received from the Fund, the Manager paid trailer commissions of \$7,936 during the period ended June 30, 2021 to Sightline Wealth Management, an affiliate of the Manager.

INCENTIVE FEES

The Fund also pays the Manager an annual incentive fee, equal to a percentage of the average net asset value of the applicable Series of the Fund. Such percentage will be equal to 10% of the difference by which the return in net asset value per unit of the applicable Series from January 1 to December 31 exceeds the percentage return of the S&P/TSX Capped Energy Total Return Index for the same period. If the performance of a Series of the Fund in any year is less than the performance of the Index (the "Deficiency"), then no incentive fee will be payable until the performance of the applicable Series, on a cumulative basis, has exceeded the amount of the Deficiency. For the period ended June 30, 2021, the Fund accrued \$2,351,466 of incentive fees.

OPERATING EXPENSES

The Fund pays its own operating expenses, which include, but are not limited to, audit, legal, custodial, trustee, filing and administrative expenses as well as unitholder reporting costs. The Manager pays certain of these expenses on behalf of the Fund and then is reimbursed by the Fund. At its sole discretion, the Manager may waive or absorb a portion of the operating expenses of certain Funds. Amounts waived or absorbed by the Manager are reported in the Statements of Comprehensive Income. Waivers or absorptions are at the Manager's discretion and can be terminated at any time without notice. The Manager did not absorb any expenses during the period ended June 30, 2021.

OTHER RELATED PARTY TRANSACTIONS

The Fund relied on the approval, positive recommendation or standing instruction from the Fund's Independent Review Committee with respect to any related party transactions.

1 This information is derived from the Fund's interim and audited annual financial statements.

2 The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. Net assets and distributions are based on the actual number of units outstanding at the relevant time. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

3 Distributions are reinvested in additional units of the fund or paid in cash.

4 Series I units were subscribed for on January 3, 2017 and then were fully redeemed during the year ended December 31, 2019.

5 Information provided is for the period from May 10, 2018 (first issuance) for Series D, and December 3, 2018 (first issuance) for Series PTF, to December 31, 2018.

6 All outstanding Series PTF units were fully redeemed during the period ended December 31, 2020.

7 Information provided is for the period from May 12, 2021 (first issuance) to June 30, 2021 for ETF Series.

1 This information is provided as at June 30, 2021 and December 31 for the years shown prior to 2021.

2 Management expense ratio ("MER") is based on total expenses (including incentive fees, if any; excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period. The Manager may waive or absorb a portion of the operating expenses of the Fund. Waivers and absorption can be terminated at any time.

3 The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The TER includes dividend expense and securities borrowing expense paid by the Fund in connection with securities sold short.

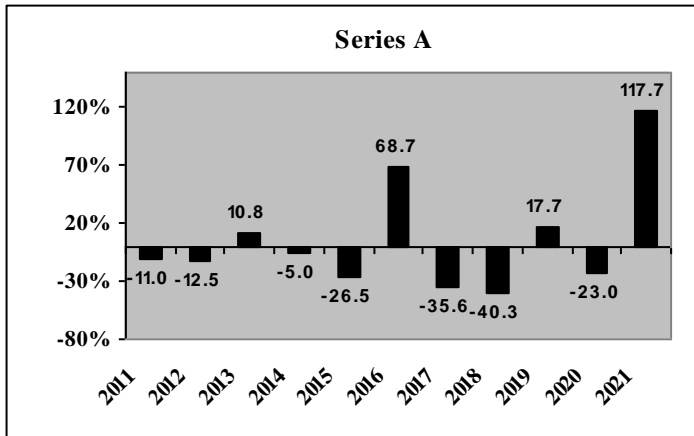

4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

Past Performance

The indicated rates of return are the historical total returns including changes in unit values and assume reinvestment of all distributions in additional units of the relevant Series of the Fund. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that may reduce returns. Please note that past performance is not indicative of future performance. All rates of returns are calculated based on the Net Asset Value of the particular Series of the Fund.

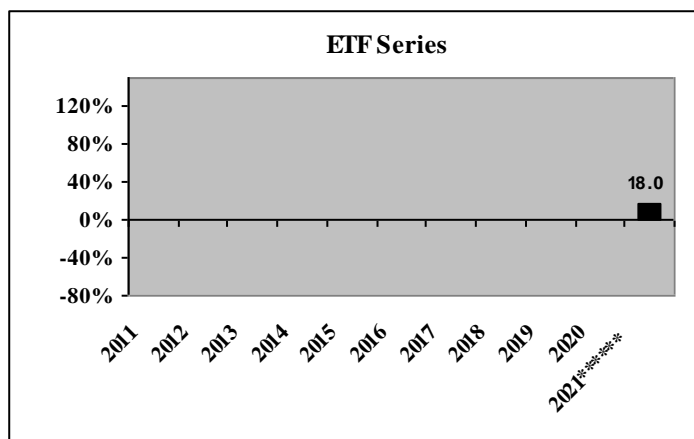

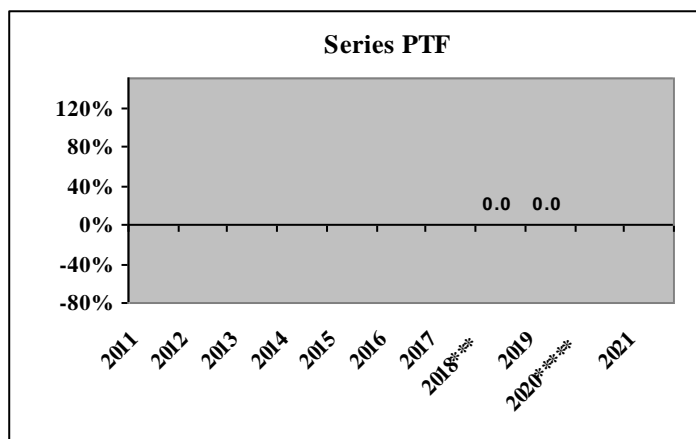

Year-by-Year Returns

The following chart indicates the performance of each Series of the Fund for the period ended June 30, 2021 and each of the previous years ended December 31 shown, unless otherwise indicated. The chart shows, in percentage terms, how much an investment made on the first day of each period would have grown or decreased by the last day of each period. Returns are not shown for a Series in any period in which there were zero outstanding shares as at the end of the period.
