Management Discussion of Fund Performance

Investment Objective and Strategies

Ninepoint Kinross Gold HighShares ETF seeks to provide securityholders with (i) long-term capital appreciation through purchasing and holding, on a levered basis, common stock of Kinross Gold Corporation and (ii) high monthly cash distributions.

To achieve its investment objective, the Fund purchases and holds up to 100% of its total assets (including assets acquired with borrowings) in the common stock of the Kinross Gold Corporation and will write covered call options on shares of the Kinross Gold Corporation. The proportion of covered call options written will vary depending on market conditions and will be based on the Fund's distribution policy, subject to a maximum write level of 50% of the common stock of the Kinross Gold Corporation held by the Fund. The Fund currently anticipates achieving its investment objective and creating leverage through the use of cash borrowing of up to approximately 33% of unlevered net asset value.

The Fund's aggregate exposure, calculated as the sum of the following, must not exceed 300% of its net asset value: (i) the aggregate market value of securities sold short; (ii) the value of indebtedness under any borrowing arrangements for investment purposes; and (iii) the aggregate notional value of the Fund's specified derivative positions excluding any specified derivatives used for hedging purposes.

As part of its investment strategy, the Fund may:

- use derivative instruments to reduce transaction costs and increase the liquidity and efficiency of trading;
- use derivatives to hedge its exposure to the common stock of the Kinross Gold Corporation or to generate additional income;
- invest in or use derivative instruments, including futures contracts and forward contracts in compliance with National Instrument 81-102 ("NI 81-102") or the appropriate regulatory exemptions have been obtained and is consistent with the Fund's investment objective and strategies;
- borrow cash up to a maximum of 50% of its net asset value and may sell securities short, provided that the aggregate market value of securities sold short will be limited to 50% of its net asset value. The combined use of short selling and cash borrowing by the Fund is subject to an overall limit of 50% of its net asset value; and
- holds cash, short-term money market instruments, fixed income securities or other equivalents at any time, including, in accordance with NI 81-102, other investment Funds managed by Ninepoint Partners LP (the "Manager") that invest all or substantially all of their assets in cash or cash equivalents, for cash management purposes.

Risks

The risks of investing in the Fund are described in the Fund's simplified prospectus. This Fund is suitable for investors with a high tolerance of risk.

Results of Operations

The Fund's net asset value was $8.9 million as at June 30, 2026.

Gold prices were volatile during the first half of 2026, reaching a record high in late January 2026 before retreating meaningfully through the second quarter as investors reassessed interest rate expectations and took profits following the substantial gains of 2025. The decline in bullion prices weighed on gold equities broadly, and the share value of Kinross Gold Corporation (the "Company") declined alongside the sector despite its diversified portfolio of producing mines, disciplined operational execution and consistent production.

The Fund invests in the Company and seeks to enhance income by writing covered call options on up to 50% of the portfolio securities of the Fund. The Fund may also employ leverage through cash borrowing of up to 33% of its net asset value. Elevated volatility in both gold prices and mining equities increased option premiums during the period, and the income generated by the covered call strategy partially offset the decline in the underlying shares.

For the period from the Fund's inception to June 30, 2026, decline in the Company's share price alongside lower gold prices was partially offset by option premium income. The Fund made regular monthly distributions. The Company's diversified production profile and disciplined operating execution continue to underpin the Fund's income-oriented strategy, which seeks to convert the stock's elevated volatility into enhanced monthly cash flow.

Recent Developments

The Manager actively monitors the positioning of the Fund's portfolio for changes in current market conditions and the economic environment.

SEMI-MONTHLY DISTRIBUTIONS

Effective with the August 2026 distribution cycle, the Fund will no longer pay distributions monthly and instead will begin paying distributions twice monthly.

Related Party Transactions

MANAGEMENT FEES

The Fund pays the Manager an annual management fee of 0.29%, plus applicable taxes including HST, that is calculated and accrued daily based on the daily net asset value of the ETF unit and is paid monthly. For the period ended June 30, 2026, the Fund incurred management fees (including taxes) of $4,578.

OPERATING EXPENSES

The Fund pays its own operating expenses, which include, but are not limited to, audit, legal, custodial, filing, fund administration and shareholder reporting costs. The Manager may pay some of these expenses on behalf of the Fund and then is reimbursed by the Fund. At its sole discretion, the Manager may waive or absorb a portion of the operating expenses of the Fund and such waivers or absorptions can be terminated at any time without notice. Operating expenses waived or absorbed by the Manager is reported in the Statement of Comprehensive Income (Loss). For the period ended June 30, 2026, the Manager did not waive or absorb any operating expenses.

OTHER RELATED PARTY TRANSACTIONS

The Fund relied on the approval, positive recommendation or standing instruction from the Fund’s Independent Review Committee with respect to any related party transactions.

Loan Payable

The leverage of the Fund is created through the use of cash borrowing. The Fund has entered into a margin agreement with its prime broker (a wholly owned Canadian chartered bank) in which cash is borrowed against collateral on deposit. All cash borrowing is repayable upon demand by the prime broker. Interest is calculated based on an interest rate equal to the Canadian Overnight Repo Rate Average plus a negotiated spread.

During the period from April 10, 2026, to June 30, 2026, interest expense was $8,487 and the range of variable interest was 2.80% to 2.88%.

As at June 30, 2026, the total amount borrowed was $1,970,235 which was 22.17% of Net Assets attributable to holders of redeemable shares and the market value of investments held as collateral at its prime broker was $4,919,302.

During the period from April 10, 2026, to June 30, 2026, the minimum and maximum amounts borrowed are shown in the table below.

	June 30, 2026 ($)
Minimum Borrowed*	-
Maximum Borrowed	2,056,268

*The Fund's borrowing fluctuates daily in the normal course of business. Minimum Borrowed of $nil reflects one or more days during the period from April 10, 2026 to June 30, 2026, for which no amount was drawn under the margin facility.

Financial Highlights

The following table shows selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the period from April 10, 2026 to June 30, 2026.

1 The information is provided as at June 30, 2026.

2 Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period. The Manager may waive or absorb a portion of the operating expenses and/or management fees of the Fund. Waivers and absorption can be terminated at any time.

3 The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

5 Last closing price as at June 30, 2026.

Past Performance

In accordance with National Instrument 81-106, Investment Fund Continuous Disclosure, "PAST PERFORMANCE" disclosure consisting of "Year-by-Year Returns" is not required as the Fund commenced operations on April 10, 2026, and has been a reporting issuer for less than a year.
