VIA SEDAR+

Dear Sirs/Mesdames:

Re: Amended Annual Management Report of Fund Performance for the period ended December 31, 2025 (“MRFP”) for Ninepoint Canadian Natural Resources HighShares ETF (the “ETF”)

SEDAR Project 06420191

The attached MRFP of the ETF was amended to correct the ETF’s risk rating from “Medium” to “Medium to High” on page 2 of the MRFP of the ETF.

Other than correcting the foregoing, there are no other changes to the MRFP for the ETF.

Please do not hesitate to contact us should you have any questions or concerns.

Yours truly,

BORDEN LADNER GERVAIS LLP

Management Discussion of Fund Performance

Investment Objective and Strategies

The objective of the Ninepoint Canadian Natural Resources HighShares ETF (the "Fund") is to seek to provide securityholders with (i) long-term capital appreciation through purchasing and holding, on a levered basis, common stock of Canadian Natural Resources Limited and (ii) high monthly cash distributions.

In order to achieve its investment objective, the Fund purchases and holds up to 100% of its of its total assets (including assets acquired with borrowings) in the common stock of Canadian Natural Resources Limited and will write covered call options on shares of Canadian Natural Resources Limited. The proportion of covered call options written will vary depending on market conditions and will be based on the Fund's distribution policy, subject to a maximum write level of 50% of the common stock of Canadian Natural Resources Limited held by the Fund. The Fund currently anticipates achieving its investment objective and creating leverage through the use of cash borrowing of up to, at least initially, approximately 25% of unlevered net asset value and it is anticipated that the Fund will maintain a leverage ratio within this range of its net asset value.

As part of its investment strategy, the Fund may:

- use derivative instruments to reduce transaction costs and increase the liquidity and efficiency of trading;
- use derivatives to hedge its exposure to the common stock of Canadian Natural Resources Limited or to generate additional income;
- may invest in or use derivative instruments, including futures contracts and forward contracts in compliance with National Instrument 81-102 ("NI 81-102") or the appropriate regulatory exemptions have been obtained and is consistent with the Fund's investment objective and strategies; and
- may also hold cash, short-term money market instruments, fixed income securities or other equivalents at any time, including, in accordance with NI 81-102, other investment Funds managed by the Manager that invest all or substantially all of their assets in cash or cash equivalents, for cash management purposes.

Risks

The risks of investing in the Fund are described in the Fund's simplified prospectus. This Fund is suitable for investors with a medium to high tolerance of risk.

Results of Operations

The Fund's net asset value was \$8.6 million as at December 31, 2025.

The Fund utilized a covered call strategy combined with up to 25% leverage to generate enhanced yield from the Canadian Natural Resources Limited blue-chip energy holding. By writing options on the stock, the Fund aimed to convert price stability into distributable cash flow while maintaining upside exposure. The Fund delivered consistent income throughout the period and kept monthly distributions steady, including a \$0.13/share payout for December 2025.

For the period from August 21 to December 31, 2025, the Fund outperformed the Canadian Natural Resources Limited stock's return of 10.8%. The Fund's success was driven by:

- **Ideal Volatility Capture:** The Canadian Natural Resources Limited stock's more methodical rise allowed the Fund to collect option premiums without frequently hitting its strike price caps, demonstrating the specific market conditions where this strategy excels; and
- **Income Buffer:** The option income provided a consistent "top-up" to the total return, allowing the Fund to beat the double-digit capital appreciation of the asset through yield generation.

Overall, the Fund demonstrated the strategy's "sweet spot," effectively turning a period of steady, moderate gains into superior performance by efficiently harvesting yield from the stock's stability.

Recent Developments

There were no material changes to the investment strategy and features of the Fund since its inception from August 21, 2025, to December 31, 2025. The Manager actively monitors the positioning of the Fund's portfolio for changes in current market conditions and the economic environment.

Related Party Transactions

MANAGEMENT FEES

The Fund pays the Manager an annual management fee of 0.29%, plus applicable taxes, that is calculated and accrued daily and is paid monthly based on the daily net asset value of the ETF Shares.

At its discretion, the Manager may choose to waive all or a portion of the management fee resulting in a reduction of the management fee charged to the Fund. In the event all or a portion of a management fee is waived, the Manager reserves the right to discontinue such waiver at any time without notice to or the consent of applicable securityholders. Effective the inception date, management fees have been waived until February 28, 2026.

OPERATING EXPENSES

The Fund pays its own operating expenses, which include, but are not limited to, audit, legal, custodial, filing and administrative expenses as well as shareholder reporting costs. The Manager may pay some of these expenses on behalf of the Fund and then is reimbursed by the Fund. At its sole discretion, the Manager may waive or absorb a portion of the operating expenses of the Fund and such waivers or absorptions can be terminated at any time without notice. Amount waived or absorbed by the Manager is reported in the Statement of Comprehensive Income (Loss). For the period from August 21, 2025 to December 31, 2025, the Manager did not waive or absorb any expenses.

OTHER RELATED PARTY TRANSACTIONS

The Fund relied on the approval, positive recommendation or standing instruction from the Fund's Independent Review Committee with respect to any related party transactions.

Loan Payable

The leverage of the Fund is created through the use of cash borrowing. The Fund has entered into a margin agreement with its prime broker (a wholly owned Canadian chartered bank) in which cash is borrowed against collateral on deposit. All cash borrowing is repayable upon demand by the prime broker. Interest is calculated based on an interest rate equal to the current Bank of Canada overnight lending rate plus an interest rate spread.

During the period from August 21, 2025 to December 31, 2025, interest expense was \$6,824 and the range of variable interest was 2.80% to 3.30%.

As at December 31, 2025, the total amount borrowed was \$1,893,345 which was 21.93% of Net Assets attributable to holders of redeemable shares and the market value of investments held as collateral at its prime broker was \$7,407,657.

During the period from August 21, 2025 to December 31, 2025, the minimum and maximum amounts borrowed are shown in the table below.

From capital gains	(0.31)
From return of capital	(0.11)
Total annual distributions³	(0.52)
Net assets, end of period	10.66

1 This information is derived from the Fund's audited annual financial statements.

2 The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period. Net assets and distributions are based on the actual number of shares outstanding at the relevant time. This table is not intended to be a reconciliation of beginning to ending net assets per share.

3 Distributions were paid in cash.

4 Information provided is for the period from August 21, 2025 (launch date) for ETF shares to December 31, 2025.

1 The information is provided as at December 31, 2025.

2 Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period. The Manager may waive or absorb a portion of the operating expenses and/or management fees of the Fund. Waivers and absorption can be terminated at any time.

3 The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover is expressed as a non-annualized percentage.

5 Last closing price as at December 31, 2025.

Past Performance

In accordance with National Instrument 81-106, Investment Fund Continuous Disclosure, “PAST PERFORMANCE” disclosure consisting of “Year-by-Year Returns” is not required as the Fund has been a reporting issuer for less than a year.
