Before you invest in any fund, consider how the fund would work with your other investments and your tolerance for risk.

This Fund is an alternative mutual fund. It is permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific strategies that differentiate this fund from conventional mutual funds may include the ability to borrow cash to use for investment purposes and increased ability to invest in physical commodities. While these specific strategies will be used in accordance with the Fund’s investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.

The Fund invests in the digital currency bitcoin (“Bitcoin”). Given the speculative nature of Bitcoin and the volatility of the Bitcoin markets, there is considerable risk that the Fund will not be able to meet its investment objectives. An investment in the Fund is not intended as a complete investment program and is appropriate only for investors who have the capacity to absorb a loss of some or all of their investment. An investment in the Fund is considered high risk.

HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

Ninepoint Partners LP has rated the volatility of the Fund as **High**.

Because this is a new fund, the risk rating is only an estimate by Ninepoint. Generally, the rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund’s returns, see the sections entitled “What are the risks of investing in the fund?” and “Who should invest in this fund?” in the Fund’s simplified prospectus.

A WORD ABOUT TAX

In general, you’ll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

The following tables show the fees and expenses you could pay to buy, own and sell Class F units of the Fund. The fees and expenses including any commissions – can vary among Class of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. SALES CHARGES

You do not pay a sales charge when you buy, redeem or switch your Class F units.

2. FUND EXPENSES

The Fund’s expenses are made up of the management fee, operating expenses and trading costs. You don’t pay these expenses directly. They affect you because they reduce the Fund’s returns. The Class F units’ annual management fee is 0.70% of the Class’ value. Because this class is new, operating expenses and trading costs are not yet available.
