

Ninepoint Global Macro Fund

(formerly, Ninepoint FX Strategy Fund)

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

DECEMBER 31

2024

The annual management report of fund performance is an analysis and explanation that is designed to complement and supplement an investment fund's financial statements. This report contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can obtain a copy of the annual financial statements at your request, and at no cost, by calling 1-888-362-7172, by visiting our website at www.ninepoint.com or SEDAR+ at www.sedarplus.ca or by writing to us at: Ninepoint Partners LP, Royal Bank Plaza, South Tower, 200 Bay Street, Suite 2700, P.O. Box 27, Toronto, Ontario M5J 2J1. Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The objective of Ninepoint Global Macro Fund (the “Fund”) is to generate long term total returns by investing globally in FX futures on a long/short basis. To achieve the Fund’s investment objective, the sub-advisor will utilize several investment trading methodologies collectively known as the “FX Strategy” at the standard level of risk to invest in foreign currency futures utilizing a Bayesian statistical model to identify current drivers of currency returns. The Fund will use derivatives, which may introduce leverage into the Fund. The Fund may also borrow cash and sell securities short. The Fund’s maximum aggregate exposure to short selling, cash borrowing and derivatives used for leverage must not exceed 300% of the Fund’s net asset value, calculated on a daily basis.

P/E Global LLC is the sub-advisor for the Fund.

Risks

The risks of investing in the Fund are described in the Fund’s simplified prospectus. This Fund is suitable for investors with a medium to high tolerance for risk.

Results of Operations

The Fund, Series A, returned 17.9% in 2024, while its benchmark returned 11.6%.

The January 2024 releases of the U.S. Federal Reserve meeting minutes, and speeches by multiple U.S. Federal Reserve Governors during the month, provided a more balanced outlook after tumultuous market movements at year-end. Further, most growth indicators turned positive in January 2024. As a result, the December 2023 U.S. Dollar decline was largely reversed. In February 2024, the U.S. Dollar appreciated against most major currencies, especially the Japanese Yen and the Swiss Franc. Stronger U.S. growth and higher inflation data shifted market expectations for the U.S. Federal Reserve easing this year, from six cuts to three. Continued improvements in U.S. growth, coupled with higher inflation data, modestly reduced market expectations for the U.S. Federal Reserve easing in March 2024. By contrast, the Swiss National Bank started an easing cycle. Finally, the Bank of Japan (“BOJ”) eliminated negative rates. While historic in nature, this BOJ action had an immaterial impact on exchange rates. The U.S. Dollar strengthened versus global currencies in April 2024, as continued higher inflation data further reduced market expectations for U.S. Federal Reserve easing. Slightly weaker economic data in the U.S., combined with improving economic expectations for both Europe and Asia, drove some liquidation of U.S. Dollar holdings in May 2024. Increasing expectations for U.S. Federal Reserve easing during the month also contributed to U.S. Dollar weakening. In June 2024, long positions in the U.S. Dollar grew as the U.S. Federal Reserve held rates steady, while European central banks began their cutting cycle. In addition, inflation expectations remained elevated in the U.S. on the back of higher energy prices.

The U.S. Dollar performance was choppy in July 2024, weakening early in the month, and then recovering versus most major currencies by month end. We saw significant crowding in many currencies, including the Japanese Yen and Canadian Dollar. As U.S. employment showed signs of slowing growth, market participants sold U.S. Dollars in August 2024, in anticipation of U.S. Federal Reserve interest rate cuts. Extreme short-term yield inversion signaled a period of risk aversion. August 2024 also saw the rapid unwinding of carry trades, most notably in the widespread covering of Japanese Yen short positions. This unwinding had minimal impact on the strategy’s performance, as our models had shifted away after noting significant crowding in recent months. The U.S. Federal Reserve reduced the U.S. Federal Funds rate by 50 basis points in September 2024 and signaled that an easing cycle had begun. By the end of the third quarter, the fixed income markets were projecting extreme easing over the following twelve months, with expectation levels not seen for twenty-five years. Strong U.S. economic data in October 2024 led investors to adjust their expectations of monetary easing. At this point, although further easing by the U.S. Federal Reserve was still expected, the amount no longer exceeded that anticipated during the crisis periods of 2000 to 2001 and 2007 to 2008. The U.S. election in November 2024 heightened fears of global trade disruptions, and resulting inflationary pressures, causing prospects for substantial U.S. Federal Reserve easing to fall further. In December 2024, investors began to price in the diversion in growth and inflation prospects between the U.S. and the rest of the world, and interest rate differentials widened significantly.

The economic outlook for the U.S. remains attractive, on a relative basis. Prospects of material stimulus from Chinese policymakers have been reduced. The divergence in inflation between North America and the rest of the world, especially Asia, is fueling rate divergences. In turn, these divergences serve as catalysts for currency revaluations.

From a factor perspective, inflation and long-term interest rate differentials drove FX Strategy positioning during the first half of the year. The short end of the yield curve factor also increased in significance by the end of June, supporting the argument for monetary policy divergence. By year end, we note that global growth remains significant, supporting continued U.S. outperformance. The importance of inflation remains high; while, expected rate cuts have become less important. Looking forward, we continue to hold bearish positions in European and Asia-Pacific currencies, versus those of North America.

Positive performance in 2024 was driven largely by the FX Strategy's Euro, Australian Dollar, and Japanese Yen positioning.

There were no significant changes to the FX Strategy implemented during the referenced period.

The Fund's net asset value increased by 176.6% during the year, from \$6.7 million as at December 31, 2023 to \$18.7 million as at December 31, 2024. This change was predominantly due to net subscriptions of \$9.9 million and net realized and unrealized gains on investments of \$2.2 million.

Recent Developments

The Manager actively monitors the positioning of the Fund's portfolio for changes in current market conditions and the economic environment.

On May 3, 2024, Ninepoint FX Strategy Fund was renamed Ninepoint Global Macro Fund. There were no changes to the investment objectives or strategies of the Fund.

Related Party Transactions

MANAGEMENT FEES

The Fund pays a management fee to the Manager at an annual rate of 2.05% for Series A units, 2.25% for Series A1 units, 1.75% for Series D and Series F1 units, 1.55% for Series F and Series QF units, and as negotiated by the unitholders for Series I. The management fee is calculated and accrued daily based on the daily net asset value of that series of the Fund and is paid monthly. For the year ended December 31, 2024, the Fund incurred management fees (including taxes) of \$207,980. The breakdown of the services received in consideration of the management fees, as a percentage of management fees, is as follows:

	Portfolio Advisory	Trailing Commissions*
Series A	76%	24%
Series A1	78%	22%
Series D	100%	—
Series F	100%	—
Series F1	100%	—
Series I	100%	—

* Series I trailing commissions are based on a rate that is negotiated and agreed upon by the Manager and dealer.

Of the management fees that the Manager received from the Fund, the Manager paid trailer commissions of \$2,181 during the year ended December 31, 2024, to Sightline Wealth Management, an affiliate of the Manager.

PERFORMANCE FEES

The Fund also pays the Manager a quarterly performance fee equal to 20% of the difference by which the return in the net asset value per unit of the applicable series from the first business day of the calendar quarter (or from inception if any series commences on a date other than the beginning of the quarter), to the last business day of the calendar quarter exceeds the high water mark per unit of such series. The “high water mark” is the greater of (i) the initial net asset value per unit, or (ii) the net asset value per unit at the end of the most recent calendar quarter for which a performance fee was paid after giving effect to all distributions in, and payments of performance fees for, such calendar quarter. The net asset value includes all expenses and is calculated before income and capital gains are distributed. The performance fee is calculated and accrued daily and paid quarterly on a calendar quarter basis. For the year ended December 31, 2024, the Fund accrued performance fees of \$50,579.

OPERATING EXPENSES

The Fund pays its own operating expenses, which include, but are not limited to, audit, legal, custodial, filing and administrative expenses as well as unitholder reporting costs. The Manager may pay some of these expenses on behalf of the Fund and then is reimbursed by the Fund. At its sole discretion, the Manager may waive or absorb a portion of the operating expenses of the Fund. Amounts waived or absorbed by the Manager are reported in the Statements of Comprehensive Income (Loss). Waivers or absorptions are at the Manager’s discretion and can be terminated at any time without notice. For the year ended December 31, 2024, the Manager absorbed expenses of \$14,723.

OTHER RELATED PARTY TRANSACTIONS

The Fund relied on the approval, positive recommendation or standing instruction from the Fund’s Independent Review Committee with respect to any related party transactions.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the years ended December 31 shown, unless otherwise indicated.

1 This information is derived from the Fund's audited annual financial statements.

2 The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. Net asset and distributions are based on the actual number of units outstanding at the relevant time. This table is not intended to be a reconciliation of the beginning to ending net assets per unit.

3 Distributions were reinvested in additional units of the Fund.

4 Information provided is for the period from April 9, 2020 (launch date) for Series A units, Series F units and Series I units, April 10, 2020 (first issuance) for Series D units, August 7, 2020 (first issuance) for Series F1 units and August 21, 2020 (first issuance) for Series A1 units, to December 31, 2020.

5 All outstanding Series I units were fully redeemed during the year ended December 31, 2021.

6 Information provided is for the period from March 8, 2024 (re-subscription) to December 31, 2024 for Series I units.

1 This information is provided as at December 31 for the years shown.

2 Management expense ratio ("MER") is based on total expenses (including performance fees, if any; excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage (other than performance fees which are not annualized) of daily average net asset value during the period. The Manager may waive or absorb a portion of the operating expenses of the Fund. Waivers and absorption can be terminated at any time.

3 The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The TER includes dividend expense and securities borrowing expense paid by the Fund in connection with securities sold short.

4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

Past Performance

The indicated rates of return are the historical total returns including changes in unit values and assume reinvestment of all distributions in additional units of the relevant Series of the Fund. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that may reduce returns. Please note that past performance is not indicative of future performance. All rates of returns are calculated based on the Net Asset Value of the particular Series of the Fund.

Year-by-Year Returns

The following chart indicates the performance of each Series of the Fund for the years ended December 31 shown, unless otherwise indicated. The chart shows, in percentage terms, how much an investment made on the first day of each period would have grown or decreased by the last day of each period. Returns are not shown for a Series in any period in which there were no outstanding units as at the end of the period.

*

Return from April 9, 2020 (launch date) for Series A units, Series F units and Series I units, April 10, 2020 (first issuance) for Series D units, August 7, 2020 (first issuance) for Series F1 units, and August 21, 2020 (first issuance) for Series A1 units, to December 31, 2020 (not annualized).

**

Series I units were fully redeemed during the year ended December 31, 2021.

Return from March 8, 2024 (re-subscription) to December 31, 2024 for Series I units (not annualized).

Ninepoint Global Macro Fund *(formerly, Ninepoint FX Strategy Fund)*

December 31, 2024

Annual Compound Returns

The following table illustrates the annual compound total return for each Series of units of the Fund for the periods shown. As a basis of performance comparison, the annual compound return of the Fund is compared to that of its Index (the “Index”). The Index is designed to broadly represent the performance of managed futures hedge funds. Since the Fund does not necessarily invest in the same futures or in the same proportion as the Index, the performance of the Fund is not expected to equal the performance of the Index.

	1-Year	3-Year	Since Inception*
Series A	17.9%	10.8%	3.1%
Index	11.6%	10.6%	6.5%
Series A1	18.3%	9.9%	6.3%
Index	11.6%	10.6%	9.0%

A Note on Forward-Looking Statements

This report may contain certain statements that constitute forward-looking statements. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words or expressions such as “anticipate”, “believe”, “plan”, “estimate”, “expect”, “intend”, “target” or negative versions thereof and other similar expressions or future or conditional verbs such as “may”, “will”, “should”, “would” and “could” and similar expressions to the extent they relate to future financial performance of the Fund or a security and the Fund’s investment strategies and prospects. The forward-looking statements are not historical facts but reflect the expectations or forecasts of future results or events as at the date of this report. These forward-looking statements are subject to a number of risks, uncertainties and assumptions that could cause actual results or events to differ materially from current expectations including, without limitation, general economic, political and market factors in North America and internationally, movements in interest and foreign exchange rates, the volatility of equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, and the ability of Ninepoint to attract or retain key employees. This list of important risks, uncertainties and assumptions is not exhaustive. These and other factors should be considered carefully, and readers should not place undue reliance on forward-looking statements. The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.
