HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility."

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

Ninepoint Partners LP has rated the risk rating of the Fund as **low to medium**.

This rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the "What are the risks of investing in the Fund?" section of the Fund's simplified prospectus.

NO GUARANTEES

Like most mutual funds, this Fund does not have any guarantees. You may not get back the amount of money you invest.

HOW HAS THE FUND PERFORMED?

Year-by-year returns

This chart shows how Series QF units of the Fund performed in the past 4 calendar years. However, year-by-year returns for Series QF units of the Fund have not been presented for 2023, 2024 or 2025 because Series QF units were not outstanding for the full calendar years. The Fund dropped in value in 1 of the past 4 calendar years. The range of returns and change from year to year can help you assess how risky the Fund has been in the past. It does not tell you how the Fund will perform in the future.

Best and worst 3-month returns

This table would generally show the best and worst returns for Series QF units of the Fund in a 3-month period over the past 4 calendar years and to March 31, 2026. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live, the type of earnings (i.e., income or capital gains), and whether or not you hold the Fund in a registered plan such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your Fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

2. Fund Expenses

Performance Fee

The Fund pays Ninepoint Partners LP a quarterly performance fee equal to 10% of the amount by which the return in the net asset value of the series from the calendar quarter exceeds the previous high water mark. The high water mark is a sum of the greater of (i) the initial net asset value per unit, or (ii) the net asset value at the end of the most recent calendar quarter for which a performance fee was paid after giving effect to all distributions in, and payments of performance fees for, such calendar quarter, and 0.75% for the same period (the "Hurdle Rate"). If the performance of the series in any calendar quarter is negative, such negative return will be added to the subsequent calendar quarter's high water mark for that series. If the performance of the series in any calendar quarter is positive, but below the Hurdle Rate, the subsequent calendar quarter's high water mark will be the prior calendar quarter's ending net asset value per unit of the series.
